

## **FSE 201: Engineering UGTA**

### **UGTA Self-Selected Contribution Template**

**UGTA Name:** Jacob Hreshchyshyn  
**UGTA Course:** CSE205  
**Course Professor:** Farideh Tadayon-Navabi  
**Session:** C

---

**Activity Title:** Exam Review Session  
**Expected Points:** 2

---

#### **Activity Summary:**

I and another UGTA named Amanda Chin worked together to prepare and host an exam review session held via Zoom to prepare students for the second class exam. The review session was held on April 12<sup>th</sup> and lasted approximately from 4:30 PM to 6:00 PM. I counted 21 students in attendance. During the review session, we covered examples in recursion, traces of various searching and sorting algorithms, the JavaFX GUI hierarchy and other GUI examples, event handling, nested classes, interfaces, linked lists, polymorphism, exception handling, stacks, queues, and algorithm complexity. Overall, the student reaction to the review session was positive. One minor hitch in its execution was the incident when my computer crashed during the session. Fortunately, Amanda was able to hold the review session while I rejoined the meeting. Additionally, Amanda has the second part of the recording, which will assist in helping the students reference the study material. Aside from that, our review session was informative and resulted in useful slides and videos to help students in preparing for the second exam.
